

## Grips

Stainless steel grip model #3-4. Diameter 22 mm.

Stainless steel grip model #4-5. The biggest and the heaviest in our collection. Diameter 30 mm.

Stainless steel grip model #5-1 & #5-2. Common model and most popular. Diameter 23 mm and 25 mm.

Stainless steel grip model #7-7. Slightly tapered toward the back end. Without knurled area therefore it is easier to clean but on the other hand it is a bit difficult to tightly grabbed by novice. Diameter 25mm.

Stainless steel grip model #7-8. Knurled area placed where it should be. Diameter 23 mm.

Stainless steel grip model #7-12. Knurled area is wide enough to grab between fingers. Tapered to the back end hence made it easier to do maneuver with the machine. Diameter 25 mm.

Colored aluminium alloy grip (#6-4). Lightweight grip. 22 mm diameter. For those who looks for size but not weight.

Screw lock system grip. A unique system to lock the tip in its place that makes changing between tips a lot more easier.

Special grip (#13-2) for 18mm disposable tubes. It will add the front weight and diameter thus makes you easier to tattoo with balance in mind.

We carry most type and size of disposable tubes with 18mm grip diameter. A must for critical sterile situation demand.
